## HVAC noise control enclosure reduces compressor noise and maintains tranquility around special care home

Revera Inc. is a leading provider of seniors' accommodation, care and services, with about 250 locations throughout North America. The Meadows, Revera's long-term care facility in Ancaster, ON, is located in close proximity to neighboring homes and was in need of an attractive and simple noise mitigation solution for its ground-mounted HVAC systems.

### Consultant chooses AIL Sound Walls noise control enclosure

The owner's noise and vibration consultant, dBA Environmental Services Inc., recommended our Silent Protector absorptive sound barrier wall system for a variety of reasons.

- Lightweight and easy to hand-install in a tight space
- Lower installed cost
- Fast and flexible solution
- Attractive color and finish to match building's exterior

### Project at a glance:

**Name:** The Meadows

**Location:** Ancaster, ON

**Owner:** Revera Inc.

**Owner's Consultant:** dBA Environmental Services Inc.

**Contractor:** J. G. Carpentry

**Product:** Silent Protector (Absorptive)

**Sector:** Healthcare

**Application:** Sound Wall Enclosure

**Project Size:** 52 m<sup>2</sup>

**Installation Time:** Three days (start to finish)

The AIL Sound Walls team was able to respond quickly using material from inventory and providing onsite assistance for the three-day installation.

The completed project looked great, solved the noise problem for the neighbors and the owner was very happy. In fact, we've since been contacted by Revera's National Maintenance Manager to discuss noise mitigation solutions at some of their other facilities.
