AIL Sound Walls installed for three more FedEx logistics centers in Montana and Idaho

This group of projects further expands AIL Sound Walls' extensive portfolio of logistics center noise barrier wall solutions, this time for three FedEx ground distribution centers in Havre and Livingston, Montana, and Bellevue, Idaho.

Our partners on these three projects were Moltus Building Group and SWi Fence and Supply. Working with them on these installations strengthened our relationship with FedEx, having already designed and supplied noise barrier walls for FedEx distribution centers in New Brighton, Minnesota, and Sydney, Nova Scotia.

Havre, Montana

Project at a glance:

Name: Three Midwest FedEx Logistics Centers

Locations: Havre and Livingston, MT, and Bellevue, ID

Owner: FedEx

Engineer: TD&H Engineering

General Contractor: Moltus Building Group

Sound Wall Sub-Contractor: SWi Fence and Supply

Product: Tuf-Barrier (Reflective)

Sector: Industrial

Application: Depot & Loading Dock Sound Walls

Dimensions: Three walls: 115', 370', 375' long x 10', 12', 15' tall

Installation Time: Three weeks

All three sound barrier wall projects ran concurrently

It was a bit challenging for us with all three projects running at the same time, along with some slight layout changes, but our partners were great to work with. We had collaborated on setting expectations and communicated well throughout the process. Positive feedback was received on all three projects and we hope to work with them on some future FedEx projects.

AIL Sound Walls are ideal for commercial facilities

Noise from large commercial developments and their associated mechanical systems and truck traffic can be mitigated economically with AIL Sound Walls. Our lightweight PVC systems create low-maintenance sound barrier walls and equipment surrounds to help commercial developments keep the peace. Typical applications include:

- Distribution Centers
- Loading Docks
- Big Box Stores
- Mechanical System Barriers
- Rooftop System Surrounds
- Generator Surrounds
