## Two AIL Sound Walls join buildings and make better neighbors at Wag Hotels in Santa Monica, CA

News travels fast among dogs and once the gang at Wag Hotels, Santa Monica heard that the Wag Hotels, Santa Clara got a new AIL Sound Walls enclosure, they absolutely had to have one for themselves. Plus, it would be the perfect backdrop for their upcoming “WagKiki Beach Paw-rt’y”.

Helpfully, the Santa Clara owners told the Santa Monica owners how pleased they were with their new sound barrier wall. They even used the same installation contractor, CMGi Construction.

### Project at a glance:

**Project:** Wag Hotels, Santa Monica

**Location:** Santa Monica, CA

**Owner:** Wag Hotels

**Contractor:** CMGi Construction

**Product:** Tuf-Barrier (Reflective)

**Sector:** Commercial

**Application:** Dog Kennel/Daycare

**First Wall Dimensions:** 72' long x 10' tall, with one door

**Second Wall Dimensions:** 50' long x 10' tall, with one door

**Installation Time:** Three weeks

This installation has two separate walls adjoining the buildings, each with its own gate custom-made by AIL Sound Walls.

They feature a woodgrain texture, but being made of lightweight PVC panels, they're much more durable and won't rot, rust or stain. Plus, they are very easy to install in the tight spaces and turns around the hotel, snuggling up to the buildings with integrated doors and even architectural lighting mounted to it on the outside.

### Absorptive or Reflective sound barriers for a variety of applications

With Sound Transmission Class (STC) ratings of up to 39, our Silent Protector (Absorptive) and Tuf-Barrier (Reflective) sound barrier systems are engineered for maximum sound reduction of environmental or ambient noise such as traffic, manufacturing, industrial or commercial noise.

### AIL Sound Walls' Features & Benefits quickly stack up

AIL Sound Walls' Features & Benefits quickly stack up to make them the go-to choice over noise barrier walls made from concrete, wood or other materials.

- Lightweight PVC construction
- Sound-mitigation performance
- Lower installed costs
- Durable and low maintenance
- Sustainable and enviro-friendly choice
- Enhanced aesthetics and finish levels
- Project design versatility
- Experienced project partner

The best thing about the new sound walls is that the neighbors are happy. And that's really important to both the daycare owners and the dogs.
